KILLARNEY
METALS

PROUDLY **MADE IN** *America*

KILLARNEY METALS started in 2011 with a desire to help people. For more than a decade we have been releasing new, innovative spill containment solutions based on

customers' needs. We started in the basement of an old cotton mill in Belmont, NC with a mission to provide the best solutions in the industry. Though this may have seemed like a daunting task, our team was well equipped with engineers and with experience in flat sheet metal fabrication.

All of our products are made here in the United States and produced with extreme attention to detail. When we first started, a customer would come to our door and inquire about a design, often sketched out on a piece of paper. We would help these customers turn their concepts into physical products.

At the time, no one offered any type of online marketplace for spill containment pans. We saw an ever-increasing demand for standardized pan sizes in the industry. The desire to provide solutions birthed killarneymetals.com.

Being the first to market, we understood the importance of providing resources to assist the end-users. Fortunately, our expertise in metal manufacturing and engineering allowed us to develop resources useful in the specification and installation of spill containment solutions. Our objective was not only to set the standard for innovation in the industry but also to help people. Innovation and liberating knowledge are key components of our core values along with a dedication to Made in the USA.

The future for Killarney is bright. We recognize that the industry is always changing and adapting. We at Killarney Metals are committed to keeping up to date with these changes by providing new solutions to the industry. Since our beginning, we have expanded our product offerings to include washer pans, water heater pans, rolling caster pans, hanging pans, and much more. With warehouses in both North Carolina and Utah, we're able to service our customers in the US with quick, free ground shipping. Thank you for supporting Killarney Metals and our Made in the USA products. We look forward to serving you on your next project.

RESIDENTIAL

A HOME is a significant investment, and your home holds some of your most precious possessions. On average, faulty plumbing and failed appliances cause over \$7,000 in water damage per occurrence! How can you protect your home and belongings from water damage? A drip or drain pan from Killarney Metals is one of the most cost-effective solutions for protecting your investment. We produce durable, long-lasting metal pans and trays for a variety of appliances and other applications such as washers, ice makers, refrigerators, under sink cabinets and more. ••

COMMERCIAL

PROTECTING YOUR EMPLOYEES and keeping your business operating smoothly is vital. At Killarney Metals we specialize in producing heavy-duty spill containment pans designed to protect your coworkers from slips, to keep your production floor free from spills, and save you time and money by eliminating the risk of violations of EPA and OSHA standards. You work hard, so we design our pans to work hard too. When you purchase a Killarney Metals drip or drain pan, you are buying a pan made right here in the USA with ISO certified quality standards and attention to craftsmanship. ••

CUSTOM DESIGN + FABRICATION

WE UNDERSTAND that no two spill containment requirements are exactly the same. That is why, at Killarney Metals, we provide custom manufacturing services to produce just the right drip or drain pan to suit your job. Whether needing a custom pan for your petroleum refinery process or a specially designed pan for the office water cooler, we have manufacturing services for you. ••

OUR SPILL CONTAINMENT SOLUTIONS ARE
BACKED BY OUR NO LEAK+ GUARANTEE.

ALL KILLARNEY PRODUCTS ARE **100%** **DESIGNED + PRODUCED IN THE UNITED STATES OF AMERICA.**

WE PROVIDE INNOVATIVE,
AMERICAN-MADE SPILL CONTAINMENT
SOLUTIONS FOR RESIDENTIAL,
COMMERCIAL, AND INDUSTRIAL
APPLICATIONS. WHEN YOU ORDER
FROM KILLARNEY METALS, KNOW THAT
YOUR PRODUCTS WILL BE PRODUCED
WITH QUALITY IN MIND AND
your satisfaction
AS THE HIGHEST PRIORITY.

WASHER PANS

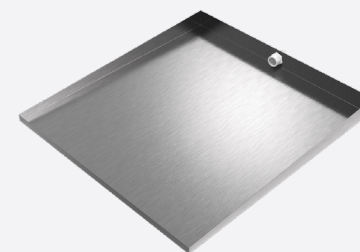

OUR HEAVY-DUTY WASHER DRIP PANS are made to prevent water damage and mold problems for homeowners. We have Washer Pans that work with any brand washing machine. Standard plastic washer pans can crack, dry rot or even cause uneven surfaces for your washing machine to rest on which can lead to more water leaks or spills. Don't settle for cheap when protecting your home.

Michelle E.

ICE MAKER PANS + WATER HEATER PANS

WATER HEATER PANS prevent damage by controlling water heater leaks and diverting the leaking water to a drainpipe away from your belongings. Installing a Water Heater Drain Pan is an investment that pays high dividends. Don't go cheap when it comes to the protection of your home. Invest in one of our high-quality Water Heater Pans.

ICE MAKER PANS can save your home and office from unnecessary damage and unexpected expenses. Our reliable Ice Maker Trays come in galvanized, stainless, and aluminum material to easily compliment and protect your space.

Matthew B.

EQUIPMENT+ SPECIALTY PANS

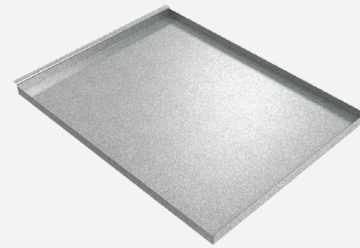

EQUIPMENT ALWAYS POSES A SPILL POTENTIAL and safety hazard in a production facility or industrial environment. Machines need oil and lubricating fluids to operate. These fluids can and do leak creating a workplace hazard. Pans are simple, economical tools that effectively contain spills and prevent accidents that would otherwise be commonplace in factories or warehouses. Using Equipment and Specialty Pans protects workers against injury and meets OSHA requirements.
